1	General	1
1.1	Reviewer 1	1
1.2	Reviewer 2	2
1.3	Reviewer 3:	2
1.4	Overall:	2

1 General

- cv was strong
- mentoring team was good

1.1 Reviewer 1

- need an FA pub
- good collaborators, but must elaborate on roles
 - Dr. Puri specifically emphasized that the sponsor and co-sponsor roles must be more clearly defined and I should enumerate who will teach me what
 - * she emphasized that I have a great score and should resubmit
 - When preparing for resubmission, put title/expected date + journal of prepared/submitted manuscripts

1. **TODO** Clearly define roles of sponsors
2. **TODO** clearly elaborate on roles of collaborators

3. **TODO** Dr. Puri said to make it a point to emphasize that I am the one performing the analysis of images
4. **TODO** Edit your biosketch and state that at present x is what you wanna do but as you get through training you may diverge
 - must back this up with reason and say you are still in the training process (have not completed third year)

1.2 Reviewer 2

Stated that the aims were interdependent

- improve discussion of potential pitfalls and alternative strategies
- Dr. puri: “great score hopefully next time”

1.3 Reviewer 3:

- make sure there are available biosketches for letter writers + collaborators
- make sure the figures look pretty for resubmission
-

1.4 Overall:

- This is a great project
- talk to your sponsor and put together a one page intro that addresses all the critiques politely and clearly
 - next meeting will evaluate how well this is written
- if you are training any students be sure to include this
- emphasize rigor, reproducibility, and unbiased ness
- indicate intended submission date and journal of any manuscripts
- not guaranteed that you will get the same reviewers
- make sure aims are not interdependent
 - if aim 1 fails what will you do?

- * whatever you propose, the primary sponsor needs to have a major role in the training and the biosketches need updating
 - indicate the other md/phd + phd students the sponsors have mentored
